

User Guide for Smart City Standards Intelligence Platform

1. Executive Overview

- Open the Executive Overview page.
- Select a Domain from the filter.
- Review the Overall Maturity Score.
- Check Evidence Quality and Data Readiness.
- Review the Strongest and Weakest Domains.
- Check the High-Priority Gaps.
- Review the Recommended Actions.
- Use the chart to compare Domain Maturity Scores.

2. Standards Library

Standards Library

Browse selected standards and indicators.

Standard: All standards | Domain: All domains | Project type: All project types

40 indicators | All domains | All project types

Indicator catalogue

Select a row to inspect its definition and assessment requirements.

ID	Indicator	Domain
☐ E1	Green spaces and desertification control	Smart Environment
☐ E10	Storage capacity of the city's energy grid per total city energy consu	Smart Environment
☐ E2	Preserve vital natural resources	Smart Environment
☐ E8	Percentage of the city population living in medium-to-high populati	Smart Environment
☐ E11	Percentage of households with smart water meters	Smart Environment
☐ E3	Percentage of buildings in the city with smart energy meters	Smart Environment
☐ E4	Percentage of households with smart energy meters	Smart Environment
☐ E7	Percentage of public garbage bins that are sensor-enabled public gi	Smart Environment
☐ E12	Annual total collected municipal food waste sent to a processing fac	Smart Environment
☐ E6	Percentage of total amount of plastic waste recycled in the city	Smart Environment
☐ E5	Percentage of total amount of waste in the city that is used to gener	Smart Environment
☐ E13	Percentage of total amount of wastewater in the city that is used to	Smart Environment
☐ E9	Percentage of treated wastewater being reused	Smart Environment
☐ G2	Digital transformation governance	Smart Governance
☐ G7	Measurement of innovation in the city's digital infrastructure	Smart Governance

Indicator information

E1 - Green spaces and desertification control

Smart Environment - Desertification management

STANDARD SOURCE

SCI Smart City Standards Project

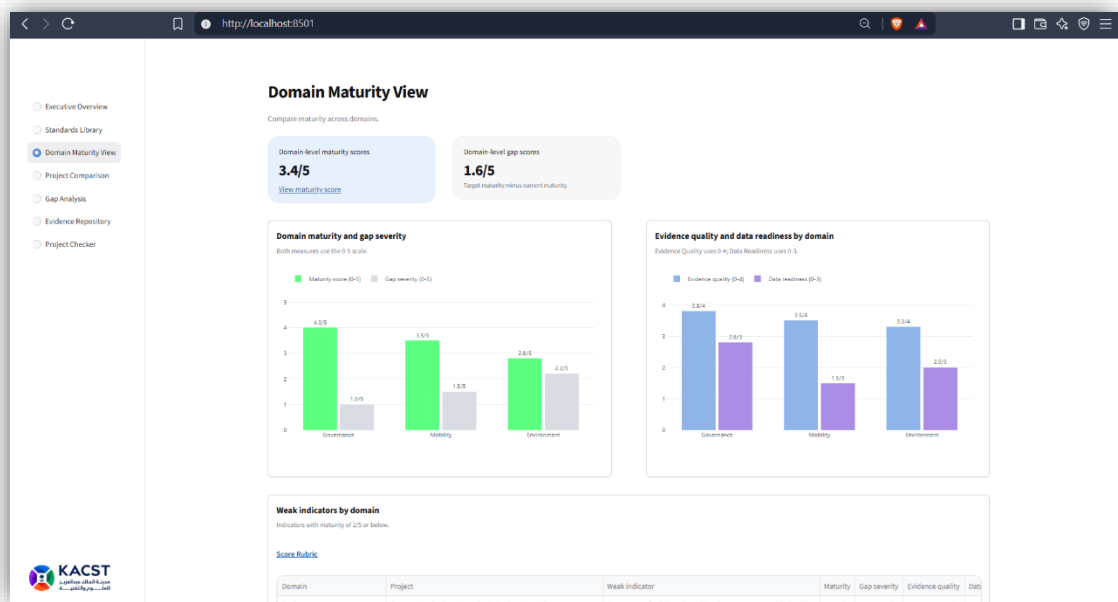

Applicable project types: Urban Greening, Desertification Control, Green Infrastructure

Operational indicator specification

INDICATOR DEFINITION	MEASUREMENT METHODS
Measure green spaces and control desertification	Total green space area (m ²) per capita and percentage of city area under desertification risk mitigation measures
REQUIRED EVIDENCE	REQUIRED DATA
GIS satellite imagery, Ministry of Environment reports, Urban greening project plans	Total green space area (m ²) per capita, percentage of city area under desertification risk mitigation
APPLICABLE PROJECT TYPES	APPLICABILITY GUIDANCE
Urban Greening, Desertification Control, Green Infrastructure	Urban greening projects, Sustainability projects
ASSESSMENT & LIMITATIONS	METHODS SCORING GUIDANCE

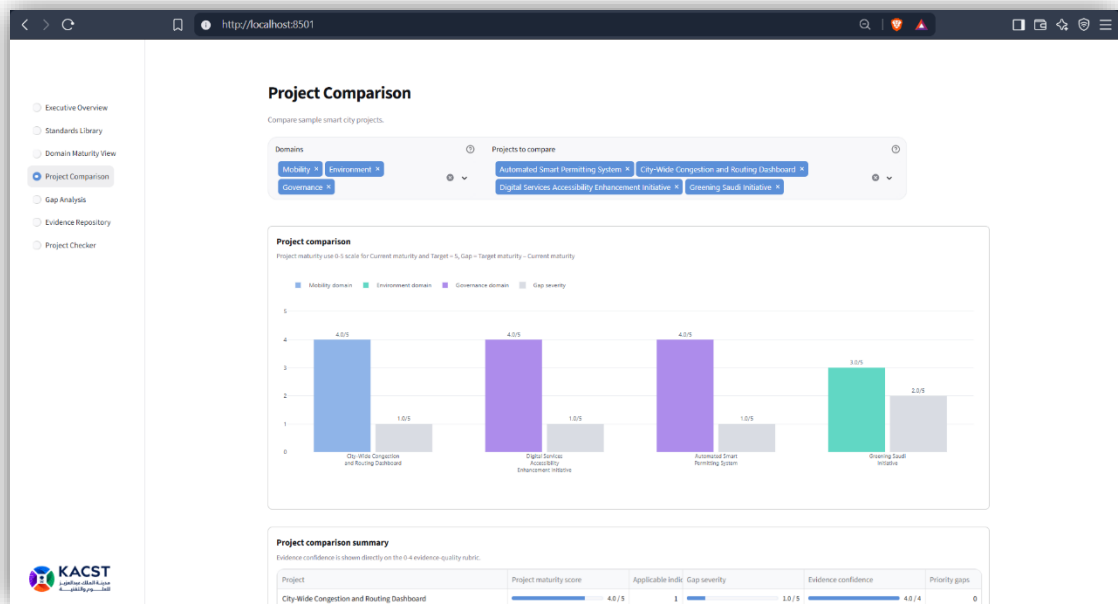

- Open the Standards Library page.
- Select a Standard, Domain, or Project Type from the filters.
- Browse the list of available indicators.
- Select an indicator from the table.
- Review the Indicator Information.
- Check the Definition and Measurement Method.
- Review the Required Evidence and Required Data.
- Check the Applicable Project Types and assessment guidance.

3. Domain Maturity View

- Open the Domain Maturity View page.
- Review the overall Domain-Level Maturity Score.
- Review the Domain-Level Gap Score.
- Compare maturity and gap severity across domains.
- Review Evidence Quality and Data Readiness by domain.
- Check the Weak Indicators by Domain table.
- Use the scoring links to understand how the scores are calculated.

4. Project Comparison

- Open the Project Comparison page.
- Select the Domains you want to compare.
- Select the Projects you want to compare.
- Review the project comparison chart.
- Compare the Maturity Scores of the selected projects.
- Compare the Gap Severity.
- Review the comparison summary.
- Check the Evidence Quality and Priority Gaps for each project.

5. Gap Analysis

Gap Analysis
Identify where improvement is most needed.

Domain: All domains | Project: All projects

Largest maturity gaps
Indicators ranked by Target maturity - Current maturity.

Project	Domain
Sensor-Based Urban Waste Optimization Network	Environment
Intelligent Traffic Lights Control System	Mobility

Missing data indicators
Indicators with Data Readiness level 0/3.

No indicators have Data Readiness 0/3.

High-risk low-evidence indicators
Indicators with a maturity gap and Evidence Quality of 1/4 or below.

No high-risk low-evidence indicators were found.

Priority action
All indicators with a recommended action, ranked by gap severity.

Project	Domain	Indicator	Gap severity	Priority level
Sensor-Based Urban Waste Optimization Network	Environment	E7 - Percentage of public garbage bins that are sensor-enabled public garba	4 / 5	High

High-impact gaps

Project	Indicator
Sensor-Based Urban Waste Optimization Network	E7 - Percentage of public garbage bins that are
Intelligent Traffic Lights Control System	M6 - Percentage of traffic lights that are intellig
Greening Saudi Initiative	E1 - Green spaces and desertification control
Greening Saudi Initiative	E2 - Preserve vital natural resources
Residential Smart Metering Initiative	E3 - Percentage of buildings in the city with sm
Digital Services Accessibility Enhancement Initiative	G12 - Average downtime of the city's IT infrastr
Misk City Mobility	M11 - Number of bicycles available through mu
Misk City Mobility	M12 - Number of users of sharing economy tran
City-Wide Congestion and Routing Dashboard	M1 - Percentage of city streets and thoroughf
Residential Smart Metering Initiative	E11 - Percentage of households with smart wat

KACST
الهيئة العامة للغذاء والدواء
Saudi Vigilance

- Open the Gap Analysis page.
- Select a Domain from the filter.
- Select a Project if needed.
- Review the Largest Maturity Gaps.
- Check the High-Impact Gaps.
- Review indicators with Missing Data.
- Check the High-Risk Low-Evidence Indicators.
- Review the Priority Actions to identify areas that require improvement.

6. Evidence Repository

The screenshot shows a web application titled "Evidence Repository" with a sidebar navigation menu on the left. The main content area features a header with the title and a sub-header "Make scoring transparent and reviewable." Below this are three dropdown filters: "Project" (set to "All projects"), "Domain" (set to "All domains"), and "Evidence quality" (set to "All levels"). Below the filters are three tabs: "Evidence records" (selected), "All projects", "All domains", and "All levels". The "Evidence records" tab displays a table with columns: "Evidence ID", "Project", "Indicator ID", and "Linked indicator". The table lists 17 records, each with a checkbox in the "Evidence ID" column. To the right of the table is a "Evidence details" panel for the selected record "Issuing a Building Permit". This panel includes fields for "Evidence source" (Balady Municipal System), "Evidence type" (Official government website), "Evidence date" (2022-11-17), "Source organization" (Ministry of Municipalities and Housing), "Evidence quality level" (A/B: Verified evidence), "Quality weighting" (Evidence reviewed by an expert, stakeholder, or project owner), "Reviewer notes" (The official Balady digital portal is the mandatory platform for municipal building permits...), and a "Link or reference" (Balady Services).

Evidence Repository
Make scoring transparent and reviewable.

Project: All projects | Domain: All domains | Evidence quality: All levels

17 evidence records | All projects | All domains | All levels

Evidence records
Select a row to inspect reviewer notes and traceability details.

Evidence ID	Project	Indicator ID	Linked indicator
☐ Ev13	Automated Smart Permitting System	G13	Average time for building permit approval (days)
☐ Ev13	Automated Smart Permitting System	G5	Percentage of building permits submitted online
☐ Ev4	City-Wide Congestion and Routing Dashboard	M1	Percentage of city streets and thoroughfares with real-time traffic data
☐ Ev12	Digital Services Accessibility Enhancement Initiative	G12	Average downtime of the city's IT services
☐ Ev10	Digital Services Accessibility Enhancement Initiative	G3	Percentage of city services accessible via mobile devices
☐ Ev11	Digital Services Accessibility Enhancement Initiative	G6	Annual number of online visits to city services
☐ Ev5	Greening Saudi Initiative	E1	Green spaces and desertification reduction
☐ Ev6	Greening Saudi Initiative	E2	Preserve vital natural resources
☐ Ev1	Intelligent Traffic Lights Control System	M6	Percentage of traffic lights that are adaptive
☐ Ev2	Misk City Mobility	M11	Number of bicycles available through shared mobility
☐ Ev3	Misk City Mobility	M12	Number of users of sharing economy services
☐ Ev9	Residential Smart Metering Initiative	E11	Percentage of households with smart meters
☐ Ev8	Residential Smart Metering Initiative	E3	Percentage of buildings in the city with smart meters
☐ Ev6	Residential Smart Metering Initiative	E4	Percentage of households with smart meters
☐ Ev7	Sensor-Based Urban Waste Optimization Network	E7	Percentage of public garbage bins with sensors

Evidence details
Issuing a Building Permit
Automated Smart Permitting System - G13 - Average time for building permit approval (days)

EVIDENCE SOURCE: Balady Municipal System | EVIDENCE TYPE: Official government website

EVIDENCE DATE: 2022-11-17 | SOURCE ORGANIZATION: Ministry of Municipalities and Housing

EVIDENCE QUALITY LEVEL: A/B: Verified evidence | QUALITY WEIGHTING: Evidence reviewed by an expert, stakeholder, or project owner

REVIEWER NOTES: The official Balady digital portal is the mandatory platform for municipal building permits. The system's automated tracking provides the exact data to calculate the percentage of electronic submissions and the average processing time in days.

LINK OR REFERENCE: [Balady Services](#)

- Open the Evidence Repository page.
- Filter the evidence by Project, Domain, or Evidence Quality.
- Browse the available evidence records.
- Select an evidence record from the table.
- Review the Evidence Source and Evidence Type.
- Check the Evidence Date and Source Organization.
- Review the Evidence Quality Level.
- Check the Reviewer Notes and linked indicator.
- Open the provided reference when additional verification is needed.

7. Project Checker

The screenshot shows a web browser window at <http://localhost:8501> displaying the 'Project Checker' application. On the left is a sidebar menu with options: Executive Overview, Standards Library, Domain Maturity View, Project Comparison, Gap Analysis, Evidence Repository, and Project Checker (which is selected). The main content area is titled 'Project Checker' with the subtitle 'Support early assessment of a new smart city project.' Below this is a form with several input fields and a dropdown menu. The form fields are: 'Project name *' (with an example 'Smart Parking Expansion'), 'Domain *' (with a dropdown menu showing 'Mobility'), 'Technology used' (with an example 'IoT sensors, cameras, AI, mobile application...'), 'Expected impact' (with an example 'Reduce congestion, improve service quality...'), 'Data sources' (with an example 'Sensors, databases, APIs, manual records...'), 'Current status' (with a dropdown menu showing 'Not implemented'), 'Target users' (with an example 'Citizens, operators, municipality staff...'), and 'Available evidence' (with an example 'Reports, dashboards, APIs, datasets, official documents...'). At the bottom of the form is a button labeled 'Save this project profile'. Below the form is a blue banner with the text 'Complete the project profile and select Save this project profile to view results.'

Project Checker
Support early assessment of a new smart city project.

Project name *
Example: Smart Parking Expansion

Domain *
Mobility

Technology used
IoT sensors, cameras, AI, mobile application...

Expected impact
Reduce congestion, improve service quality...

Data sources
Sensors, databases, APIs, manual records...

Current status
Not implemented

Target users
Citizens, operators, municipality staff...

Available evidence
Reports, dashboards, APIs, datasets, official documents...

Save this project profile

Complete the project profile and select Save this project profile to view results.

- Open the Project Checker page.
- Enter the Project Name.
- Select the appropriate Domain.
- Enter the Technology Used.
- Add the Expected Impact.
- Enter the available Data Sources.
- Select the Current Status.
- Enter the Target Users.
- Add the Available Evidence.
- Click Save this project profile.
- Review the generated assessment results.
